Virtual Machine II

Tom Kelliher, CS 220

Virtual Machine Instruction Exercises

Show how the contents of memory changes as each of the following instructions is executed. The first two are completed for you.

```
1: push argument 1
2: pop local 0
3: push argument 0
4: push constant 12
5: add
6: pop pointer 1
```

Memory:

Address	Value	1	2	3	4	5	6
0	263	264	263				
1	259						
2	256						
3	500						
4	600						
5	19						
6	4						
7	-12						
256	700						
257	8						
258	19						
259	6		8				
260	13						
261	12						
262	17						
263	3	8					
264	27						
265	-29
