Assignment

From Last Time

Computer Reliability.

Coming Up

Presentations: Melissa, Jonathan, and Russ.

2 Chapter Summary

1. “Debate”: Exercise 30.
2. Recent news item: Rejection, by Harvard, etc., of B-school applicants accused of using hacker-provided instructions to check their (common) acceptances.

3. Who would have thought high-tech jobs could be outsourced? Are detailed requirements specifications ala software engineering a contributing factor?
4. The effects of automation. Increased productivity; increased stress.
5. Information overload. Do you feel it, too?
6. Worker monitoring. Higher levels of monitoring thanks to RFID technology.
7. The Digital Divide.

3 Discussion Questions

Refer to the textbook.
