Your postfix calculator should be able to do all the following, just like `postfix.c`:

```
12
12 34 +
12 34 -
12 34 *
12 34 /
34 12 /
12 34 56 78 90 + + + +
12 34 + 56 + 78 + 90 +
2 3 + 4 5 + *
2 3 4 * + 5 +
2 3 4 * 5 + +
-12 -34 -
q
12 12          (Error message)
12 -          (Error message)
12 0 /        (Error message)
a             (Error message)
```
