HW3D

9/22

①

- You have the project.
- Use Canvas to join your GitHub team and create a new repo.
- Follow same steps from HW3D to get the Eclipse project into the repo and clone / replace the existing project.
- Solution program available on merlin. Open a terminal and run
hw3dsoln
- You'll find it helpful to find/use a two-button mouse
middle button \equiv left + right pressed.
- HW3D project - steps 1-3
