

Problem Set 5

CS 411

Due at the beginning of class on the first class day of the following week.
Sections 3.1–3

1. Describe the resources required by a process.
2. How is a context switch like a procedure call? How is it different?
3. Consider an operating system for a personal workstation. How are each of the three types of schedulers likely to be used, or not be used, in such a system?
